Graduate Trainee Software Engineer

Job Title: Graduate Software Engineer

Employer: Systems Mechanics Ltd. <http://www.sysmech.co.uk>

Vacancy Type: Graduate; starting February 2012

Details: Full-Time

Number Of Posts: 3

Field: Computer Science and Related Mathematical Sciences

Location: Whitstable, Kent (2 positions)
Mortimer, Berkshire (1 position)
and customer sites mainly in the UK (M4 corridor)

Contact Details: jobs@sysmech.co.uk

Job Description

Successful applicant will work alongside experienced engineers and be expected to contribute to live projects. Initially you will work in a testing & configuration capacity to address a challenging learning curve. Successful applicants must be able to work independently in customer facing roles and willing to work at client sites in the UK and abroad.

Company Information

Systems Mechanics offer high quality and challenging work with opportunities to specialise in all aspects of the software development life cycle as well as customer facing project delivery, systems integration and consultancy roles. The successful applicant will be considered for full time Graduate Engineer posting after successful completion of the probationary period.

Skills and Qualities

We are looking for candidates with a good degree seeking a challenging and rewarding career in software engineering. Java and C++ skills in Unix environment and some knowledge of networks and telecommunications would be beneficial but not mandatory. Generally, we seek candidates with good analytical minds who can apply qualitative thinking to complex problems. Creativity, attention to detail and thoroughness are also important qualities for the career ahead.
